PROFESSIONAL SUMMARY

Software Development Engineer with 1.5+ years of hands-on experience building scalable microservices-based applications using Java and Spring Boot. Strong foundation in data structures, algorithms, system design, and design patterns. Experienced in end-to-end product development, from design to deployment on AWS and GCP, with a focus on reliability, performance, and code quality.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, Go, C

Backend: Spring Boot, Microservices Architecture, RESTful APIs

Frontend: React.js, Next.js, HTML, CSS, JavaScript

Databases: PostgreSQL, MySQL, MongoDB, NoSQL, NeonDB

Cloud and DevOps: GCP, AWS EC2, S3, GCP, Docker, CI/CD with GitHub Actions

Core Concepts: Data Structures and Algorithms, OS, DBMS, CN, LLD/HLD, Design Patterns

EDUCATION

B.Tech in Computer Science and Engineering, 2023 - 2027

Dr. Ambedkar Institute of Technology, Kanpur

ADDITIONAL HIGHLIGHTS

- Solved **200+ DSA problems**, strengthening algorithmic thinking
- Hands-on experience with **GCP deployment and cloud-native development**
- Familiar with **unit testing, CI/CD pipelines, and version control (Git)**
- Strong ability to **optimize backend performance and debug production issues**

TECHNICAL PROJECTS

Full-Stack E-commerce Platform | Spring Boot, React.js, AWS, Docker

Designed and developed a scalable microservices-based system with product catalog, cart, and order management. Implemented secure REST APIs with JWT authentication and RBAC. Applied LLD and design patterns to keep the architecture modular and maintainable. Deployed the application on AWS and GCP using Docker for scalable production-ready infrastructure.

[SwiftURL](#) - URL Shortener with Analytics | Java, PostgreSQL, REST APIs , [github](#)

Built a high-performance URL redirection microservice with low latency and high availability. Implemented real-time analytics and optimized database queries for better performance. Containerized and deployed services to maintain consistent production environments. Debugged production-level issues and improved system reliability.

NetGuard-AI - Intrusion Detection System | ML, Backend Services , [github](#)

Developed a real-time threat detection system using ML models. Built backend services to process and analyze high-volume network traffic. Automated mitigation workflows to reduce manual intervention.
